DETAILED ACTION

Claim Objections

Claim 9 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claim has not been further treated on the merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejection under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamazaki et al (Fig. 2).

Yamazaki et al (Fig. 2) discloses an amplifier circuit comprising a clocked modulator (1), and multiple clocks (CLK, CLK1, CLK2) and wherein a first clock (CLK) is used to count a second clock (CLK1).

Claims 10-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Zhang (Fig. 2).

Zhang (Fig. 2) discloses an amplifier circuit comprising a detection arrangement (63) to provide an error signal (output of 63) when there is no modulator drive to an h-bridge leg (H-BRIDGE) and wherein the h-bridge leg (H-BRIDGE) includes a deadtime

generation (H-bridge is called a switching amplifier since when one transistor is on, other transistor is off).
